Yes YOU,

As you might have already gathered that Blogtard.com will be visiting your campus for recruiting interns on 10th Nov, I would like to give you a headstart on what the process is going to be like..

Our perspective of the drive can be seen as consisting of two parts:

1) The part where you choose us..

   In the sense.. You give priority to this drive over playing CS on LAN and thus choose not to screw up the written test and subsequent rounds..

   -The presentation (Which will be short btw)..
   -The website

2) The part where we choose you..

   This would be established by a classical 3 rounded drive.. A written, a group task or group discussion and a personal interview, HR&tech (language is not a barrier..)

   The technologies that we work on back-end are CakePHP and MYSQL while for the front end are CSS3, Adobe photoshop and HTML-5 (yes, we also love HTML-5!!) We expect you to be "fairly aware" about these technologies..

<div align="right">
